SECOND PRELIMINARY AMENDMENT Page 2

Div. of U.S. Appl. No. 09/661,627

IN THE CLAIMS

Please add the new claims as follows:

1-13. CANCELLED

ENTER 1/2/04

- 14. (Previously Presented) A joint formed at a junction between adjacent boards, the joint comprising:
 - a first board, comprising an upper surface, a lower surface and a groove;
- a second board joined to the first board, and comprising an upper surface, a lower surface, a tongue, a first equalizing cavity located adjacent to an upper end of a proximal end of the tongue, wherein a distal end of the tongue is smaller than a proximal end of the groove; and
- a second equalizing cavity, formed by a gap between the proximal end of the groove and the distal end of the tongue.
- 15. (Previously Presented) The joint of claim 14, wherein at least one of the first equalizing cavity and the second equalizing cavity extends to the lower surface of the second board.
- 16. (Previously Presented) The joint of claim 15, further comprising glue disposed in at least one of the first equalizing cavity and the second equalizing cavity.
- 17. (Previously Presented) The joint of claim 14, wherein the tongue comprises at least one guiding wedge on an upper surface or a lower surface thereof, whereby the at least one guiding wedge contacts an inner surface of the groove.
- 18. (New) A joint formed at a junction between adjacent boards, the joint comprising:
 - a first board, comprising an upper surface, a lower surface and a groove;

SECOND PRELIMINARY AMENDMENT Page 3

Div. of U.S. Appl. No. 09/661,627

a second board joined to the first board, and comprising an upper surface, a lower surface, and a tongue; and

said first board and said second board defining a gap therebetween; and a hole, in fluid communication with said gap.

- 19. (New) The joint of claim 18, wherein said hole extends from said joint towards a proximal section of said first or second panel.
- 20. (New) The joint of claim 18, wherein said vent extends towards said lower surface of said first or second board.
- 21. (New) The joint of claim 18, wherein said hole is a vent through one of said boards.
- 22. (New) The joint of claim 21, wherein said vent has a terminal end at said lower surface of said board.
- 23. (New) A method for assembling floor boards to form a joint therebetween, the method comprising:

providing:

a first board, said first board comprising an upper surface, a lower surface and a groove;

a second board joined to the first board, and comprising an upper surface, a lower surface, and a tongue; and

glue, disposed on at least one of said tongue and said groove; mating said groove of said first board with said tongue of said second board; and directing said glue away from said upper surface of said boards.
